Original Articles

206 Suture Contamination in Strabismus Surgery
H. Sprague Eustis, Annette Rhodes
The authors examine the contamination rate and evaluate the reduction of contamination using antibiotic-coated and antiseptic/antibiotic-coated sutures.

211 Outcomes of Strabismus Surgery for Esotropia in Children With Down Syndrome Compared With Matched Controls
W. Walker Motley, III, Andrew T. Melson, Michael E. Gray, Sheila R. Salisbury
The authors found that the presence of Down syndrome had no effect on bilateral medial rectus recession surgical results.
This continuing medical education activity is jointly sponsored by Vindico Medical Education and the Journal of Pediatric Ophthalmology & Strabismus.

216 Photodynamic Therapy for Best Disease Complicated by Choroidal Neovascularization in Children
Sengul Ozdek, Mehmet Cuneyt Ozmen, Hasan Ali Tufan, Gokhan Gurelik, Berati Hasanreisoglu
Photodynamic therapy may be an effective treatment for choroidal neovascularization associated with Best vitelliform macular dystrophy in children.

222 Effectiveness of Prisms in the Management of Diplopia in Patients Due to Diverse Etiologies
Madhura A. Tamhankar, Gui-shuang Ying, Nicholas J. Volpe
Prisms were effective in alleviation of diplopia over a broad range and for different etiologies of double vision.

230 Effect of Resveratrol on Bcl-2 and VEGF Expression in Oxygen-Induced Retinopathy of Prematurity
Wenlin Li, Deyong Jiang
Resveratrol may provide a protective effect in retinal neovascular diseases, including retinopathy of prematurity.

236 An Assessment of Ocular Morbidities of Children Born Prematurely in Early Childhood
Arton Goktas, Emin Cumhur Sener, Ali Sevik Sanac
The authors assess the ocular morbidities of premature children in early childhood.
242 Intracranial Pathology in Young Children With Apparently Isolated Nystagmus
Mansoor A. Shammari, Sahar M. Elkharmy, Arif O. Khan

Isolated early childhood nystagmus is unlikely to be associated with intracranial pathology and clinical description of nystagmus did not predict intracranial pathology in this cohort.

248 Clinical Research on the Ophthalmic Factors Affecting 3D Asthenopia
Seung-Hyun Kim, Young-Woo Suh, Jong-Suk Song, Ji-Hye Park, Yong Yeon Kim, Kuhl Huh, Jaebum Son, Keetack Khim, Taeuk Jeong, Kyung Soo Pyo

The presence of exophoria may be a risk factor for 3D asthenopia, and 3D television may induce asthenopia by exacerbating this latent problem.
